'CHRIST THORN' Hybrids

The introduction of several new species of the flowering Euphorbias, from Africa and Madagascar has given us new strains for hybridizing in this group. Results: Flowers ranging in color from chartreuse through shades of golds and reds — Flower bracts exceptionally large, some up to the size of a fifty-cent piece — Flower stalks non-glutinous, good for cut flowers or corsage, commonly six to eight inches long, many twelve inches or more — Trunk of plants thick and 'horny', and oddly beautiful. Combinations of these characteristics will guarantee sensational offerings for the future.

\$2.00 each, 3 for \$5.00; larger, \$3.50 each, 3 for \$9.00
